

Code 4 Technologies Microsoft Do More With Less Workshop

Introduction

Digital transformation for all - Big organization solution without the big org price.

This document "Service Description" describes the Code 4 Technologies workshop being provided to you "Client" by Code 4 Technologies.

Description of workshop

Code 4 Technologies workshops are worthwhile investments. We help improve the collaboration and productivity and security posture by finding health and hygiene practices that need to be addressed. We ensure that Client maximizes the full value of the Client's Microsoft Defender for Business collaboration and productivity products by identifying areas that would benefit from further optimization and can be automated and streamlined to reduce costs and resource requirements. Code 4 Technologies provides options for improving overall collaboration and productivity, governance and compliance, and security, thereby reducing risk. When coupled with our Managed Services, they can assist in planning both an IT roadmap and a path to business outcomes.

Microsoft 365 Do More With Less workshop overview

Our Microsoft 365 do more with less workshop helps busy clients understand how to maximize the capabilities and value of their Microsoft 365 Business Premium investments.

Our two hour workshop helps organizations to:

- Solve key business challenges and learn how your organization can collaborate and work effectively from virtually anywhere, improve security, and maximize technology investment.
- Hear about the common challenges SMBs face as they try to keep their networks and most valuable data assets secure.
- Learn about real time collaboration, security, and cost avoidance/reduction when you adopt Microsoft 365.
- Learn how your organization can start their digital transformation journey and learn how to leverage digital products for business operations and collaboration.
- Dive into a demo experience designed to help you think about collaboration and cybersecurity both practically and from a holistic point of view.
- Conclude with a group discussion and answer any key questions

Client requirements

Microsoft Defender for Business SMB pre engagement questionnaire is required to be completed prior to scheduling the workshop.
